

# SALMAN IZHAR

React Developer

## PROFILE

I'm a skilled front-end developer passionate about creating visually stunning and seamless user experiences, with a focus on UX design principles. I work closely with designers and developers to implement creative problem-solving skills. My goal is to empower others through my work in the front-end development field.

## EDUCATION

---

### Ahmad's Education

2022 - 2023

I have completed a frontend developer course where I learned JavaScript, Tailwind CSS, and React JS. I am currently finishing the Reactive Accelerator course.

## MY PROJECT'S

---

### Restaurant Project By React

**GitHub link:** <https://github.com/salman679/Restaurant-React>

I recently worked on a restaurant project where I utilized React. The project comprised of various features such as item showcases, add to cart, and delete options, which I believe would be useful in enhancing the overall experience of the users.

### Blog Site By JavaScript

**GitHub link:** <https://github.com/salman679/Blog-Site-By-Laravel>

This project has been successfully completed, with the frontend developed using JavaScript and the backend using Laravel. I possess a comprehensive understanding of Laravel. I kindly request you to visit the GitHub link and feel free to contact me for any further assistance or clarifications.
